Course   : Web Technology (ITM112-05)

This course is what we are going to do in the near future, as part of job. So this is a wonderful opportunity for the students to learn and implement the technology in a friendly environment. Thanks.	In totality the course was very good, but it would have been better if we had focussed on few technology rather than discussing more technologies.
The course was live. Every body discussed about the topic in the class.	No comments

This is one the relevant course in the field of information technology which deals with the various aspects of web applications. I find it very much helpful for me and I would like other too should pursue this course.	There were some discrepancies but they can neglected.
Team work,combined Study.	Nothing
We had a chance for hands-on experience in web technology able to learn core concepts of web world	could have had more discussions
Better Interaction between student and faculty	No Comments
