Comment—What you liked about this course	Comment—What you feel are the shortcomings of this course
<p>Very active participation and working on live systems.</p> <p>overall this course was good. Course is well organized. The presentation topic assigned to each student as a part of this course made us improve self study and research on the topic.</p>	<p>All the student topics presented were really good but could have been included a 1 or 2 day work shop on each of them.</p> <p>Certain topics are completed within a short period especially SERVLETS.</p>
<p>Very very helpful course.</p> <p>helpful in every sense knew about how the browsing works internally As a student in IT we should know about how web works internally and the technologies behind that. It was really helpful to know all these topics</p>	<p>Nothing.</p> <p>You could have taken some more topics rather jumping to our presentations</p>

<p>This course was a well organized, highly effective and team oriented course. The best thing about this course was the way of division of the syllabus. Initially Chopella sir started the course with a brief overview of the web technology and some core server side technologies. Lately as we got sufficient idea of the things, the course was divided into different modules and assigned to different student groups. This helped a lot in self study and made us explore the new things and related technologies in a short span of time. At the end we had a practical encounter with some of the live services in college, where we utilized our course knowledge with some self exploration, to get the things done. course is learned with the help of more practicals.</p>	<p>Personally i didn't find any shortcomings but, i think the span and scope of practical work should be broaden.</p> <p>nothing</p>
--	--

<p>The course was organized in a perfect manner and it taught me how should i handle the real world issues as well as working in a team.overall the course was good. Clearly explained the objectives and new topics.</p>	<p>-no comments-</p>
<p>very good course. every student should in IT field should under go courses like this leads him to learn not only technology and group work coordination among groups and real time work experience and exposure to real time problem solving methodologies.</p>	<p>There are no shortcomings in this course because there is no limitation of this course topics or technologies we learn.Only problem comes when students are are not participating actively with instructors.</p>

I felt involved in the course	The instructor's use of Web-based teaching tools was effective	Overall, the instructor is good as a teacher	Overall the instructor was helpful	I would like to have this instructor in another course

Comment—what did you like about your instructor	Comment—what did you not like about your instructor
All the points given above.	No Comments
encouraging motivating He used to start from the basic by giving examples that we can clearly understand. He comes to our level and teaches. Really your teaching is superb. We enjoyed it a lot.	nothing
A perfect teacher. 100% motivator. 100% sincerity and dedication to his work.	Nothing.
coming to our level and teaching the examples were so simple and we can easily understand topic with that example. Lively Enthusiastic	nuthing

<p>A great motivator. He encouraged us throughout the course and provided his immediate and valuable guidance at every step. He was fair enough at every comment and criticism, and it helped every student personally and professionally to work on there shortcomings. One best thing with the instructor was that he treated all the students alike, and this is something i really appreciate and respect!!</p>	
<p>He is a good teacher as well as motivator.</p>	<p>nothing</p>
<p>I could say in one word as short and sweet "GODFATHER".</p>	<p>-no comments-</p>
<p>His way of teaching new topics to the students. Punctuality. Communication with students.</p>	<p>no comments.</p>

<p>His way of teaching and interacting with students and classes and encouraging students to come up with new ideas and brushing up our minds towards new technologies and teaching very basic funda of Software engineering and motivation and way of understanding problems and solutions as well.</p>
